## **Automated Value Model (AVM)**

Automated valuation models (AVM) – used, for example, when ownership is not changing – come with several benefits, all of which save you time and money:

- Instant valuation based on unbiased property assessments.
- Time-saving market value estimates for residential properties.
- For low-risk loans, AVM values are often sufficient to rapidly originate the loan.
- Extremely easy to use! All you need to get started is internet access and a property address.
